

Design Public Hearing Intersection Improvements at Squantum Street and Adams Street

What is happening?

The purpose of this project is to improve traffic and safety for all users along Adams Street from Pillon Road to Brook Road including the intersection of Adams Street with Squantum Street. Specific improvements will be made to pedestrian and bicycle accommodations and safety along the corridor, while also rehabilitating the roadway pavement. Improvements to the intersection of Adams Street with Squantum Street include the installation of a traffic signal for improved and safer operations for all roadway users. Signal coordination will also be provided between the intersections of Adams Street with Squantum Street and Brook Road, due to their close proximity.

How will this affect you?

Temporary lane closures will occur during construction. Pedestrian and bicycle accommodation will be maintained through construction with the use of temporary facilities.
